An important message from the Superintendent of Schools,
Dr. Kristopher Harrison

District Announces the Launch of a New Website

June 7, 2018

Dear Community Members,

I am writing to share the exciting news that on Tuesday, June 12th, the District will launch its new website. The site is being introduced prior to the close of the current school year to allow the community to become familiar with its new look and functionality. Throughout the summer months, the District will continue to develop the site and add more content.

Informed by focus groups that included staff, parents and students, our goal was to enhance communication with the school community by introducing a website that is easy to navigate and provides access to important information and resources. The website is also compatible with all web-based devices to provide users with a mobile-friendly experience. It features media-rich content and articles that highlight the innovative work of students from across the District.

One feature we are particularly pleased to introduce is global icons. These icons are easy to find as they are located on our main page and direct users to the most sought-after information, such as calendar, transportation, athletics and lunch menus, among others. In addition, the calendars - which are compatible with many popular calendar programs such as Google Calendar and Microsoft Outlook - are embedded on the District's main page and all school pages. Users will be able to subscribe to these calendars and see events on their mobile devices or through many industry-standard calendar applications.

We are proud of the new site and excited to share it with all stakeholders in the District. Additionally, we are eager to receive feedback on your experiences with the new website. A link to provide constructive feedback can be found on the new site. Your feedback will help inform our future site enhancements.

We hope you find the new website to be a useful and valuable resource.

Sincerely,

Dr. Kristopher Harrison
Superintendent of Schools

Mr. Jesse Lubinsky
Director of Technology & Innovation
